

Casillero del Diablo

RESERVA ESPECIAL

Soils rich in red clay and granite give rise to **Reserva Especial** in Casablanca, 70 kilometres west of Santiago de Chile. Clay has been a key element in many creations throughout human history, and today it has an important role in making this wine.

The **clay-loam soils** over a granitic base in our vineyards contribute minerality and good acidity to this wine, while the zone's constant coastal breezes and morning fog regulate the temperatures and enable us to obtain a wine that captivates with its freshness and elegance.
