

BROKEN SHED™
NEW ZEALAND VODKA

Award Winning Vodka from New Zealand
GLUTEN FREE • SUGAR FREE • ADDITIVE FREE • GMO FREE

OUR STORY

Our founders set out to create a great vodka. They knew the purity and quality of New Zealand’s natural resources would create a world class vodka and they were determined to use only the best in Broken Shed Vodka.

They worked in their broken shed on the shores of Lake Wanaka, testing waters, distillates and various filtering methods for over a year, testing the results on friends and neighbors in a weekly tasting party until they had the winning combination. We think you will agree they succeeded.

INGREDIENTS

WHEY DISTILLATE: Our distillate base is whey, the protein and sugar rich by-product of dairy processing. This sustainable use of whey requires only 3 distillations to achieve maximum purity which allows the flavor nuances of the base to show through in the final product.

TWO WATERS: We uniquely blend two different waters to get the taste profile we want for Broken Shed. The waters we selected are so important to our product we ship water from the South Island to the North Island to get the perfect blend. Our South Island water comes from a 15,000 year old aquifer in the Southern Alps. The water is enhanced by the minerals it passes through as it naturally filters through the volcanic rock of the Southern Alps. We leave these minerals in the water, a key part of the taste of Broken Shed, when we blend with the filtered spring water from the North Island.

NOTHING ELSE! Pristine spring waters and whey protein distillate is all that we use to make our vodka, we are free of all additives, chemicals and sweeteners. Our vodka is certified naturally gluten-free and it is non-GMO creating a clean taste and luxurious mouthfeel that will impress.
