

REAL. LEGAL. THC.

Learn about **THC** Drinks!

An alcohol-free way to relax and socialize!

Here's what you need to know about the **THC** drinks category:

The **Delta 9 THC** in these products is the same THC found in marijuana, but are used at levels that legally comply with Federal regulations defined in the **2018 Farm Bill** (<0.3% Delta 9 THC).

These products are intoxicating. Do **not drive** or operate machinery while using these products, or if **pregnant** or **nursing**.

Consuming these drinks will lead to a **failed drug test**.

These are **Non-Alcoholic (N/A)** and do not contain any alcohol.

Do not mix with alcohol. Mixing **THC** drinks and alcohol can create intense effects stronger than using alcohol or **THC** alone.

Effects can typically be felt in as little as **5-10 minutes**.

Start low! Tolerances vary by person but **5mg** is typically reported as similar to a glass of wine or pint of IPA and **10mg** similar to a martini.

These drinks **will not** create a hangover (but may help solve one).
